

CERTIFICATE

The Institute for Cell Biology Testing Systems DARTSCH SCIENTIFIC GMBH

hereby certifies that the product

IMMUNE POWER DRINK

from

ENERGETIX GMBH & Co. KG, D-55411 Bingen

was analysed for its anti-inflammatory and anti-oxidative effectiveness in testing not involving animals both in the cell-based testing system using functional neutrophils and in the cell-free testing system. Antioxidants are important photonutrients and may aid in supporting the body's cell protection against so-called "free radicals"

Test Results:

Under the testing conditions, the Immune Power Drink demonstrated its high percentage of natural antioxidants. Therefore, it can be recommended as a preventative measure against the negative effects of free oxygen radicals.

(Expert Opinion / Test Record from October 25, 2006)
